

THE MIRACLE OF THE CORE OF PLANET EARTH

In the Holy Quran, there are six verses that contain the term IRON (الحديد) in Arabic, but only the last verse, number 25, found in Surah 57 (which is also called the Surah of Iron), tells us literally that God sent iron down to Earth after its creation:

لَقَدْ أَرْسَلْنَا رُسُلَنَا بِالْبَيِّنَاتِ وَأَنْزَلْنَا مَعَهُمُ الْكِتَابَ وَالْمِيزَانَ لِيَقُومَ النَّاسُ بِالْقِسْطِ
وَأَنْزَلْنَا الْحَدِيدَ فِيهِ بَأْسٌ شَدِيدٌ وَمَنَافِعُ لِلنَّاسِ وَلِيَعْلَمَ اللَّهُ مَن يَنْصُرُهُ وَرُسُلَهُ بِالْغَيْبِ
إِنَّ اللَّهَ قَوِيٌّ عَزِيزٌ ﴿٢٥﴾

Translation: English - Sahih International

We have already sent Our messengers with clear evidences and sent down with them the Scripture and the balance that the people may maintain [their affairs] in justice. And We sent down iron, wherein is great military might and benefits for the people, and so that Allah may make evident those who support Him and His messengers unseen. Indeed, Allah is Powerful and Exalted in Might.

This leads us to conclude that this element originates outside the solar system and is produced in the core of stars, as evidenced by this response from ChatGPT:

Conclusion

All the iron in the Earth is older than the Earth itself.

It was forged in stars, dispersed by supernova explosions, and then inherited by the Earth during its formation.

The question that now arises is why God placed this particular verse in this position among the 6,236 verses contained in the Holy Quran.

To find out for sure, we added up all the verses in the 56 suras that precede the Sura of Iron and came up with the following table:

But since the verse about iron is quoted in verse 25 of Surah 57, we have a total of $5075 + 25 = 5100$. This means that we must delve into the depths of the Holy Quran by reading 5100 verses from the beginning to learn that iron has an extraterrestrial origin!

Does the number 5100 have any connection with the depth of the Earth's core, which, let us remember, contains iron in its solid state? To find out, we consult Google, and here is its answer:

Things you may not know about the Earth's core

How deep is iron found in the Earth's core?

However, a small central portion of the core, located at a depth of about 5,100 km (3,200 miles), is composed of solid iron. This inner core is itself divided into two layers, identified only by the difference in polarity of the iron crystals that compose them. 6 days ago

So it appears without a shadow of a doubt that the choice of the overall position of the verse of iron (5100) among the 6,236 possible positions in the Holy Quran is in perfect harmony with modern scientific data.

It is up to the reader to draw the logical conclusions after this astonishing coincidence.

As for the probability P of this event occurring, it suffices to note that the only position that matches the content of the verse is position 25 in surah 57. This position is chosen from among 6,236 possible cases.

$$\text{So : } P = \frac{1}{6236}$$
